About Challenger Outdoor

Acting with the vision of becoming a global brand, Challenger Outdoor; is a Turkish-origin brand that produces outdoor textiles and accessories. All products of Challenger Outdoor are made in Turkey, headquartered in Istanbul. Challenger Outdoor, a family's profession and the gateway of trade to Europe, is a new-generation brand where 30 years of knowledge and experience meet.

"Nature; It is the brightest and most spotless mirror."

Success is teamwork. That's why we, as the Challenger Outdoor family, are close-knit. Our company's biggest goal is to be known for our reputation and reliability.

CHALLENGER OUTDOOR QUALITY

Camopic® BIG GAME 3D

Camopic® BIG GAME photo camouflage is the ultimate disguise for hunters in a wide variety of temperate zone environments. Camopic® used technology with four levels of depth, as each level comprises of different types of greenery and gets obscure at 5, 10, and 15 meters depth. Thanks to this unique, four-level technology for obtaining 3D effect in combination with 100% real images. Designed with the greatest attention to detail, Camopic® BIG GAME incorporates oak and birch stems, limbs and leaves, pine scapes and branches with cones and needles that provide cover in various wooded settings as well as in the outdoors.

Camopic® REEDS 3D

This camouflage from Camopic® REEDS 3D is designed for hunting in wetlands. Even if you hunt for species found close to fields, crops, or open areas this is the perfect hideout for you. The color palette ranges from mellow Brown to golden ochre that will make you vanish into marshes, overgrown riverbanks, and grasslands. Created with the unparalleled Camopic® technology, its deep shadows, and sharp contrasts add a unique perspective to the image.

Camopic® AUTUMN 3D

Camopic® AUTUMN utilizes the benefits of the innovative Camopic® photo technology to create the utmost cover-up for autumn hunting. The pattern is exceptionally illuminated and spread out, prevailing with dry leaf used. Camopic® autumn pattern, which provides a beautiful image with leaves, camouflages you and makes a difference with its innovative design.

Camopic® FIRE 3D

Based on the genuine Camopic® FIRE 3D we created this amazing pattern that gives a fiery orange shelter while still keeping concealment excellence. Camopic® FIRE 3D is a mix of bright color and photo camouflage that is ideal for hunting in hardwood forests. Taking advantage of the unique Camopic® photo technology, it shows the position of the hunter to humans, hiding him from the color-blind eyes at the same time. As distinguished from all its rivals Camopic® FIRE has a non-reflective background to prevent animals from spotting the reflection of UV light and so assures a careful approach and best stalking positions.

Breathtex plus means one step beyond in the waterproofness and breathability of our CHALLENGER OUTDOOR garments. Made in PTFE, this membrane means high waterproofness (over 10000 mm) and breathability (8000 gr./m2). Either laminated to the outshell fabrics or used as a layer, Breathtex plus really improves the comfort of our functional clothing.

The leathers used in belt production come from Italy as raw and the leathers are handcrafted in Turkey. The raw materials of all remaining leather products are supplied from the Anatolian region of Turkey.

Unfortunately, fabrication has taken the place of handcrafted knives. However, in these small workshops, the production of handcrafted knives continues with the master-apprentice relationship. Innovative design has come to the fore in the Challenger outdoor knife series.

All knives and sheaths in the Challenger Outdoor knife collection are handmade. Handcrafted knives made by Erdal ATASOY and Gökhan COŞKUN, the name of the artist and the date they were made are written on the knife, within the framework of respect for art and artist.

NOISELESS

Reduced noise with friction of fabrics.

DETACHABLE HOOD

Detachable hood.

WATERPROOF ZIP

Laminated zips for water resistance.

EXTRA WARM

Extra warm apparel due to increased insulation padding.

WATERPROOF TABE

Seams are sealed with waterproof tabe.

BUTTONS FOR SUSPENDERS

Buttons for suspenders

ELASTIC WAIST

Elasticated waist on sides of trousers allows a more comfortable fit.

PRESHAPED

Preshaped knees for increased comfort.

FITTED SHAPE

Fitted shape.

FRONT FLAP

Wind-blocking front flap.

VENTILATION

Under arms, ventingpockets.

LOAD STRAP

Strap that fixed to cargo pockets' flaps ensures easy access to cartridges for fast reload of gun during shooting.

BACK POCKET

Waterproof back pocket

GAME POUCH

Backside game pouch.

REINFORCED

Reinforced materials used for protection against shrubbery and thorns.

EXTRA REINFORCED

Extra-reinforced materials used for higher protection against shrubbery and thorns.

-------	------	------	------	-------	--------	--------	--------

A person wearing a brown outdoor jacket is shown from the chest down on the right side of the frame. The background is a soft-focus outdoor setting with many brown, dry leaves falling through the air, creating a sense of autumn. The lighting is warm and golden, suggesting late afternoon or early morning. The overall mood is rugged and adventurous.
